VCAL Pathways - Hands On Program

Throughout Term 2 the Hands On Program students have worked on several projects. As a class, we brainstormed the tasks we would like to be involved in and decided to construct a wood fire pizza oven. Even though this is a large project, the students applied themselves readily by researching various design costs and voted on a combined rustic and modern design. This oven will help with building a positive school community by making delicious, tasty homemade pizzas for various school celebrations. The Hands On Program aim to start the construction in Term 3.

The students also followed instructions and designed their own timber tea-light candle holders. Using a variety of hand and power tools, every student worked to measure, cut, drill, sand and stain their piece. I think you would agree from the photos below that they are all beautiful and well-made objects. Our students should be extremely proud of their achievements.

This term the program will work with the Capel Sound Foreshore team to improve the section of coastline. This will be a great opportunity to network, work outdoors and to learn about the coastal plants and the techniques used to improve this beautiful environment.

The Hands On Program class.
