This week in the garden

Today we are harvesting potatoes so that we can use them in the Home Economics classes. I have also gathered information that potatoes are native to South American countries such as Peru and North Western Bolivia where they used it to feed the silver miners who came from Spain and Portugal. The Spanish and Portuguese took the silver back to their native countries and they also took potatoes to eat on the ships and that’s how potatoes got exposed to Europe where they have been loved for hundreds of years. Potatoes are very nutritious mainly for its high content of carbohydrates which are good for muscle growth and vitamin c which is good for the immunity. We weighed our potatoes and they weighed in at 4.801kg.

Well that’s it for this week in the garden, see ya.
